

RED BACTERIA VACUUM

Monster Girls from Japan

All-female loud punk rock band from Osaka. They have participated many compilation albums. Both of their CD and their live performance are terrifyingly good!! Three pretty girls come up to the stage and start playing non stop from the beginning to the end... head banding and never say anything...

It's so cool!!

Their new album ROLLER COASTER will be released in USA from BENTEN Tokyo in Jan.2006.
